

SHORT TERM PROJECT COORDINATOR NEEDED

Do you think the public boat landing on Little St. Germain Lake needs improving in any way?

Do you have some time to help coordinate a short term project?

Wisconsin Valley Improvement Company (WVIC) has grant funding available for improvement of existing recreational access sites, including the Little Saint Germain public boat landing. Types of projects eligible for funding include:

- Entrance roads
- Boat ramps
- Picnic facilities
- Parking areas
- Piers/docks
- Erosion control
- Walking trails
- Toilets

Additional information about the program is attached.

This project will not happen without a volunteer coordinator. The Board of Commissioners already has its hands full with several time consuming projects.

Please contact the Board by responding to this message if you are willing to look into and coordinate some sort of improvements to the boat landing.

Please **DO NOT contact WVIC without first contacting this Board.** We need to avoid multiple people contacting WVIC on behalf of the district. The Board will recognize one individual and will also provide clarification of how to proceed with WVIC.

We hope to hear from you soon as the deadline for applying for grant funding is August 1st.

Ted Ritter

President, Board of Commissioners
Little St. Germain Lake Protection & Rehabilitation District
